

K-LOVE is inspiring to me as well as to those around me. I live in a rural community that has a limited selection of positive radio stations as is, and it would be a great loss to have interference with the translator service of K-LOVE that serves my area. If a LPFM broadcaster were to take priority over this translator, I would lose a connection that informs me of community events as well as national information. Please do not allow LPFM override a public-serving, family-friendly, translator service like K-LOVE.
